In addition, chocofactory offers workplaces for resilience and work training for people with health impairments on their way back into the labour market. The chocofactory also supports job-seekers who have been out of the labour market for a longer period of time in their reintegration. As a practice company, we trade in a closed network with products and services in association with other practice companies in Switzerland and abroad. All business processes are handled identically by SMEs and in accordance with the latest corporate principles. Integrated further training (professional and personal development) equips jobseekers for the labour market. Intensive application coaching supports the job search. Programme participants work with MS Office and Abacus. There is also the opportunity to familiarise themselves with Adobe CS and OpenProjects software (project management) and other programmes.

# PARTNERS

A big thank you goes to our three partners Aeschbach Chocolatier AG, PrintCenter Druck & Media AG and Hug AG. Thanks to the generous provision of image materials, samples and information, they have made a major contribution to the creation of the new catalogue. We are very pleased about our continued collaboration.

HUG AG employs around 450 people at its locations in Malters and Willisau. Founded in 1877 as a bakery in Lucerne, HUG remains a family-owned business in its fifth generation. «With heart, we bake your daily moments of indulgence,» say Anna Hug and Marianne Wüthrich Gross, who lead the company as co-CEOs, guided by three core principles: Warm-hearted, Entrepreneurial, and Conscientious – that's HUG.

Aeschbach Chocolatier has stood for Swiss chocolate art at the highest level since 1972. With passion and craftsmanship, exquisite pralines, chocolate bars and other specialties are created. The combination of tradition, innovation and the best ingredients makes Aeschbach a popular brand for the finest chocolate enjoyment.

As a printing company with modern pre-press facilities for layout, graphics, proofreading, data management and personalisation, Brunner Medien AG supports you through all phases of a communication project: from conception and design to production and logistics. The publishing house manages and administers magazines, book projects and teaching materials on a mandate basis and under its own publishing rights. Traditional products include magazines, brochures, annual reports, personalised mailings, advertising and business stationery. We value a corporate culture without rigid hierarchies, an agile way of working and self-determination. We ensure that resources are used efficiently and sparingly, and therefore also consider our processes from an ecological perspective.

## Bio

The term organic (to “organic farming”) is a term protected throughout the EU and in Switzerland by the EC Organic Regulation. The same applies to the terms certified organic and organic. Products that are described as organic must also meet the criteria of the EC Organic Regulation, but do not necessarily have to be labeled with the EU organic seal. Organic products must meet food law standards that go beyond conventional products. Only companies that fully follow the guidelines are allowed to decorate themselves with the bud. Strict controls are the foundation of the complete Bud guarantee.

## Fairtrade

The Fairtrade product label stands for fairly grown and traded products: All ingredients of a product that are available under Fairtrade conditions must be Fairtrade certified. This also applies to composite products (e.g. chocolate or ice cream). This enables smallholder cooperatives to have more stable prices and long-term trading relationships. Both farmers and plantation workers receive an additional Fairtrade premium for community projects. The standards also contain criteria for democratic organizational structures, environmental protection and safe working conditions.

## Vegan

The V-Label is an internationally recognized and protected brand for labeling vegetarian and vegan products and services. It provides a simple and safe guide for consumers. Companies use the V-Label to create transparency and clarity. Veganism is a primarily ethically based attitude and lifestyle that rejects the use of animals and animal products.

## UTZ

UTZ is a program and seal of quality for sustainable cultivation. The term “UTZ” comes from the Mayan language and means “good”. Sustainable farming supports farmers, workers and their families to achieve their goals while also contributing to protecting our natural resources - now and in the future.
